Euro-Asian Master
Medical Technology
and Healthcare Business

EMMaH master is a multidisciplinary master, focusing on the study of medical technologies through various fields of expertise: biomedical engineering, healthcare and business. MedTech industry experiences rapid innovation cycles and employs a growing number of healthcare professionals. To respond to these challenges, EMMaH prepares students to be specialised in the development, regulation, improvement and business management of technical and organisational healthcare solutions.

TAIPEI MEDICAL UNIVERSITY**

EMMaH is a professionalising master that allows students to work in an international environment by combining theoretical analysis and concrete case studies in partnership with various health organisations. Graduates are awarded a joint diploma co-signed by the EU partners, the MSc. from TMU (depending on the student's choice for the Master thesis) and digital graduation certificates.
